

WATT COIN
WHITE PAPER
ELECTRONIC CASH SYSTEM

WHITE PAPER - ELECTRONIC CASH SYSTEM

THE TWENTIETH CENTURY CONCLUDED WITH A FLAWED MONETARY SYSTEM, DEVOID OF ANY TANGIBLE GUARANTEES. MONEY SUPPLY IS CONTROLLED BY PRIVATE ENTITIES WHO MANIPULATE THE MARKET AT WILL. UNRESTRAINED EMISSIONS HAVE LED TO PERPETUAL INFLATION, WHERE DEPOSIT RATES CONSISTENTLY CORRELATE WITH INFLATION LEVELS. SAFEGUARDING ONE'S ASSETS IN THIS GLOBAL LANDSCAPE HAS BECOME INCREASINGLY CHALLENGING, IF NOT IMPOSSIBLE.

THE DAWN OF THE TWENTY-FIRST CENTURY INTRODUCED CRYPTOGRAPHY, BLOCKCHAIN, AND SUBSEQUENTLY, CRYPTOCURRENCIES. THESE INNOVATIONS UNLOCKED UNPARALLELED FINANCIAL FREEDOM THAT HAD NEVER BEFORE EXISTED. HOWEVER, THEY ALSO UNCOVERED AGE-OLD ISSUES, SUCH AS RISKS AND GUARANTEES. PRESENTLY, THE VALUE OF CRYPTOCURRENCIES IS PRIMARILY DRIVEN BY MARKET FORCES – SUPPLY AND DEMAND – WHICH IS ONLY PARTLY IDEAL. THE ISSUE ARISES WHEN THE TRADED COMMODITIES ARE NOT GOODS OR SHARES, BUT RATHER THE MEANS OF PAYMENT ITSELF. IN ESSENCE, THIS AMOUNTS TO TRADING "THIN AIR," ALBEIT BACKED BY AN OBSCURE ALGORITHM AND CONSUMING SIGNIFICANT ENERGY RESOURCES. CONSEQUENTLY, THIS PROCESS DOES NOT GENERATE ADDITIONAL VALUE BUT INSTEAD EXTRACTS IT WHILE INCURRING COSTS.

WE ARE A COLLABORATION OF ECONOMISTS, MATHEMATICIANS, AND PROGRAMMERS DEDICATED TO CREATING A CURRENCY THAT NOT ONLY FULFILLS THE ESSENTIAL FUNCTIONS OF MONEY WITHIN THE MONETARY SYSTEM BUT ALSO ENCOMPASSES THE ADDITIONAL CAPABILITIES OFFERED BY THE WORLD OF CRYPTOCURRENCY AND BLOCKCHAIN. SIMULTANEOUSLY, WE HAVE ADDRESSED THE THREE PRIMARY SHORTCOMINGS OF OUR PREDECESSORS: INFLATION, PAYMENT GUARANTEES, AND RESISTANCE TO MARKET MANIPULATION.

WHAT IS WATT COIN?

WATT COIN IS A DEFLATIONARY DIGITAL CURRENCY BACKED BY REAL WATTS OF ENERGY. ITS CIRCULATION IS LIMITED, AND ITS VALUE IS CALCULATED BASED ON THE GLOBAL AVERAGE COST OF PRODUCING 1 WATT OF ENERGY, EQUIVALENT TO THE USDT EXCHANGE RATE. THE TRANSACTION ACCOUNTING SYSTEM IS BUILT UPON THE ETHEREUM BLOCKCHAIN.

THE AXIOM OF THE TOTAL NUMBER OF WATT COINS IN THE SYSTEM ENSURES NO EMISSION IS POSSIBLE. ALL CALCULATIONS ARE GENERATED IN AN OPEN VALUE TABLE ACCESSIBLE TO ALL PARTICIPANTS.

THE OWNER OF THE 1ST WATT COIN POSSESSES THE EQUIVALENT NUMBER OF KW OF ENERGY CALCULATED IN THE VALUE TABLE AT THE TIME OF SALE.

THE VALUE TABLE EMPLOYS A UNIQUE MATHEMATICAL ALGORITHM THAT DETERMINES THE PRICE OF A WATT COIN BASED ON ITS PREVIOUS VALUE AND THE MARKET VALUE OF ALL COINS IN THE SYSTEM. IN OTHER WORDS, A COIN'S VALUE IS ALWAYS CORRELATED WITH THE NUMBER OF COINS IN CIRCULATION. THE VALUE TABLE IS PRE-GENERATED AND INCLUDES CALCULATIONS FOR ALL POTENTIAL TRANSACTIONS, WITH FIXED COIN VALUES. THE SYSTEM RECALCULATES THE INITIAL COIN VALUE AND ALL CORRELATIONS IN ONLY ONE SCENARIO – WHEN THE COST OF PRODUCING 1 WATT OF ENERGY CHANGES.

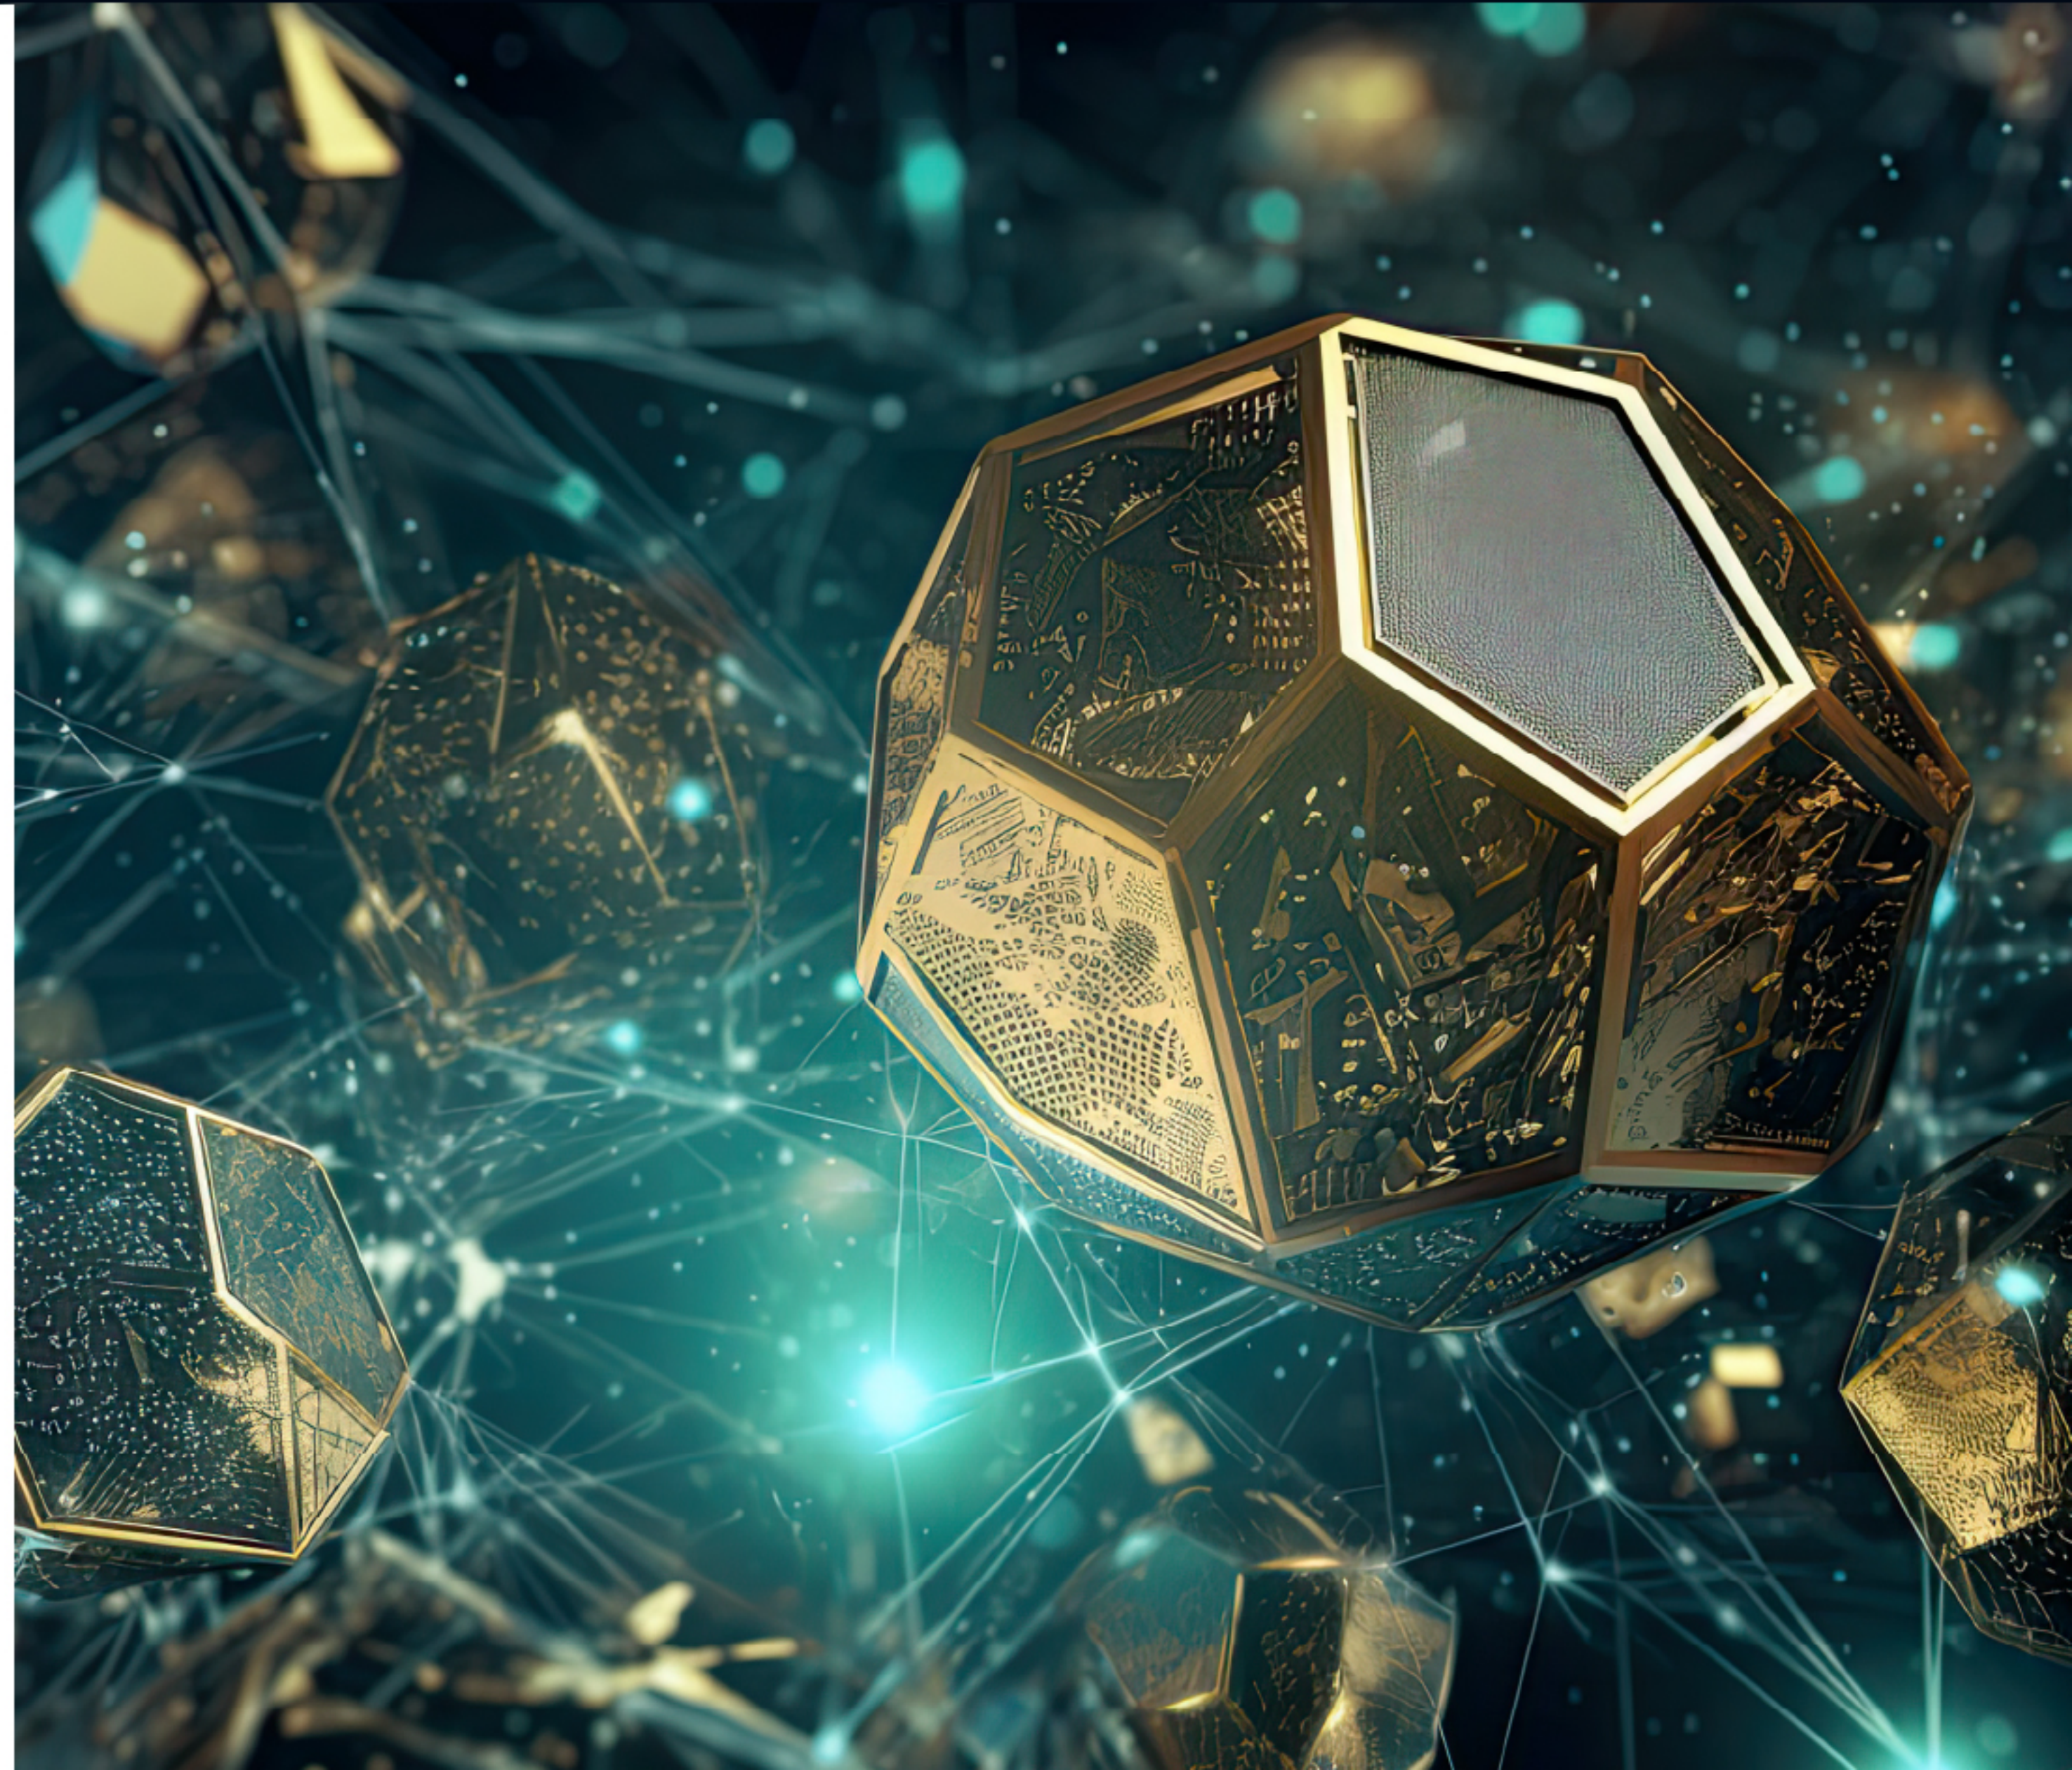

A MATHEMATICAL ALGORITHM

AXIOM:

1. TOTAL NUMBER OF COINS
2. SALE INCREMENT - 1 COIN

VARIABLES:

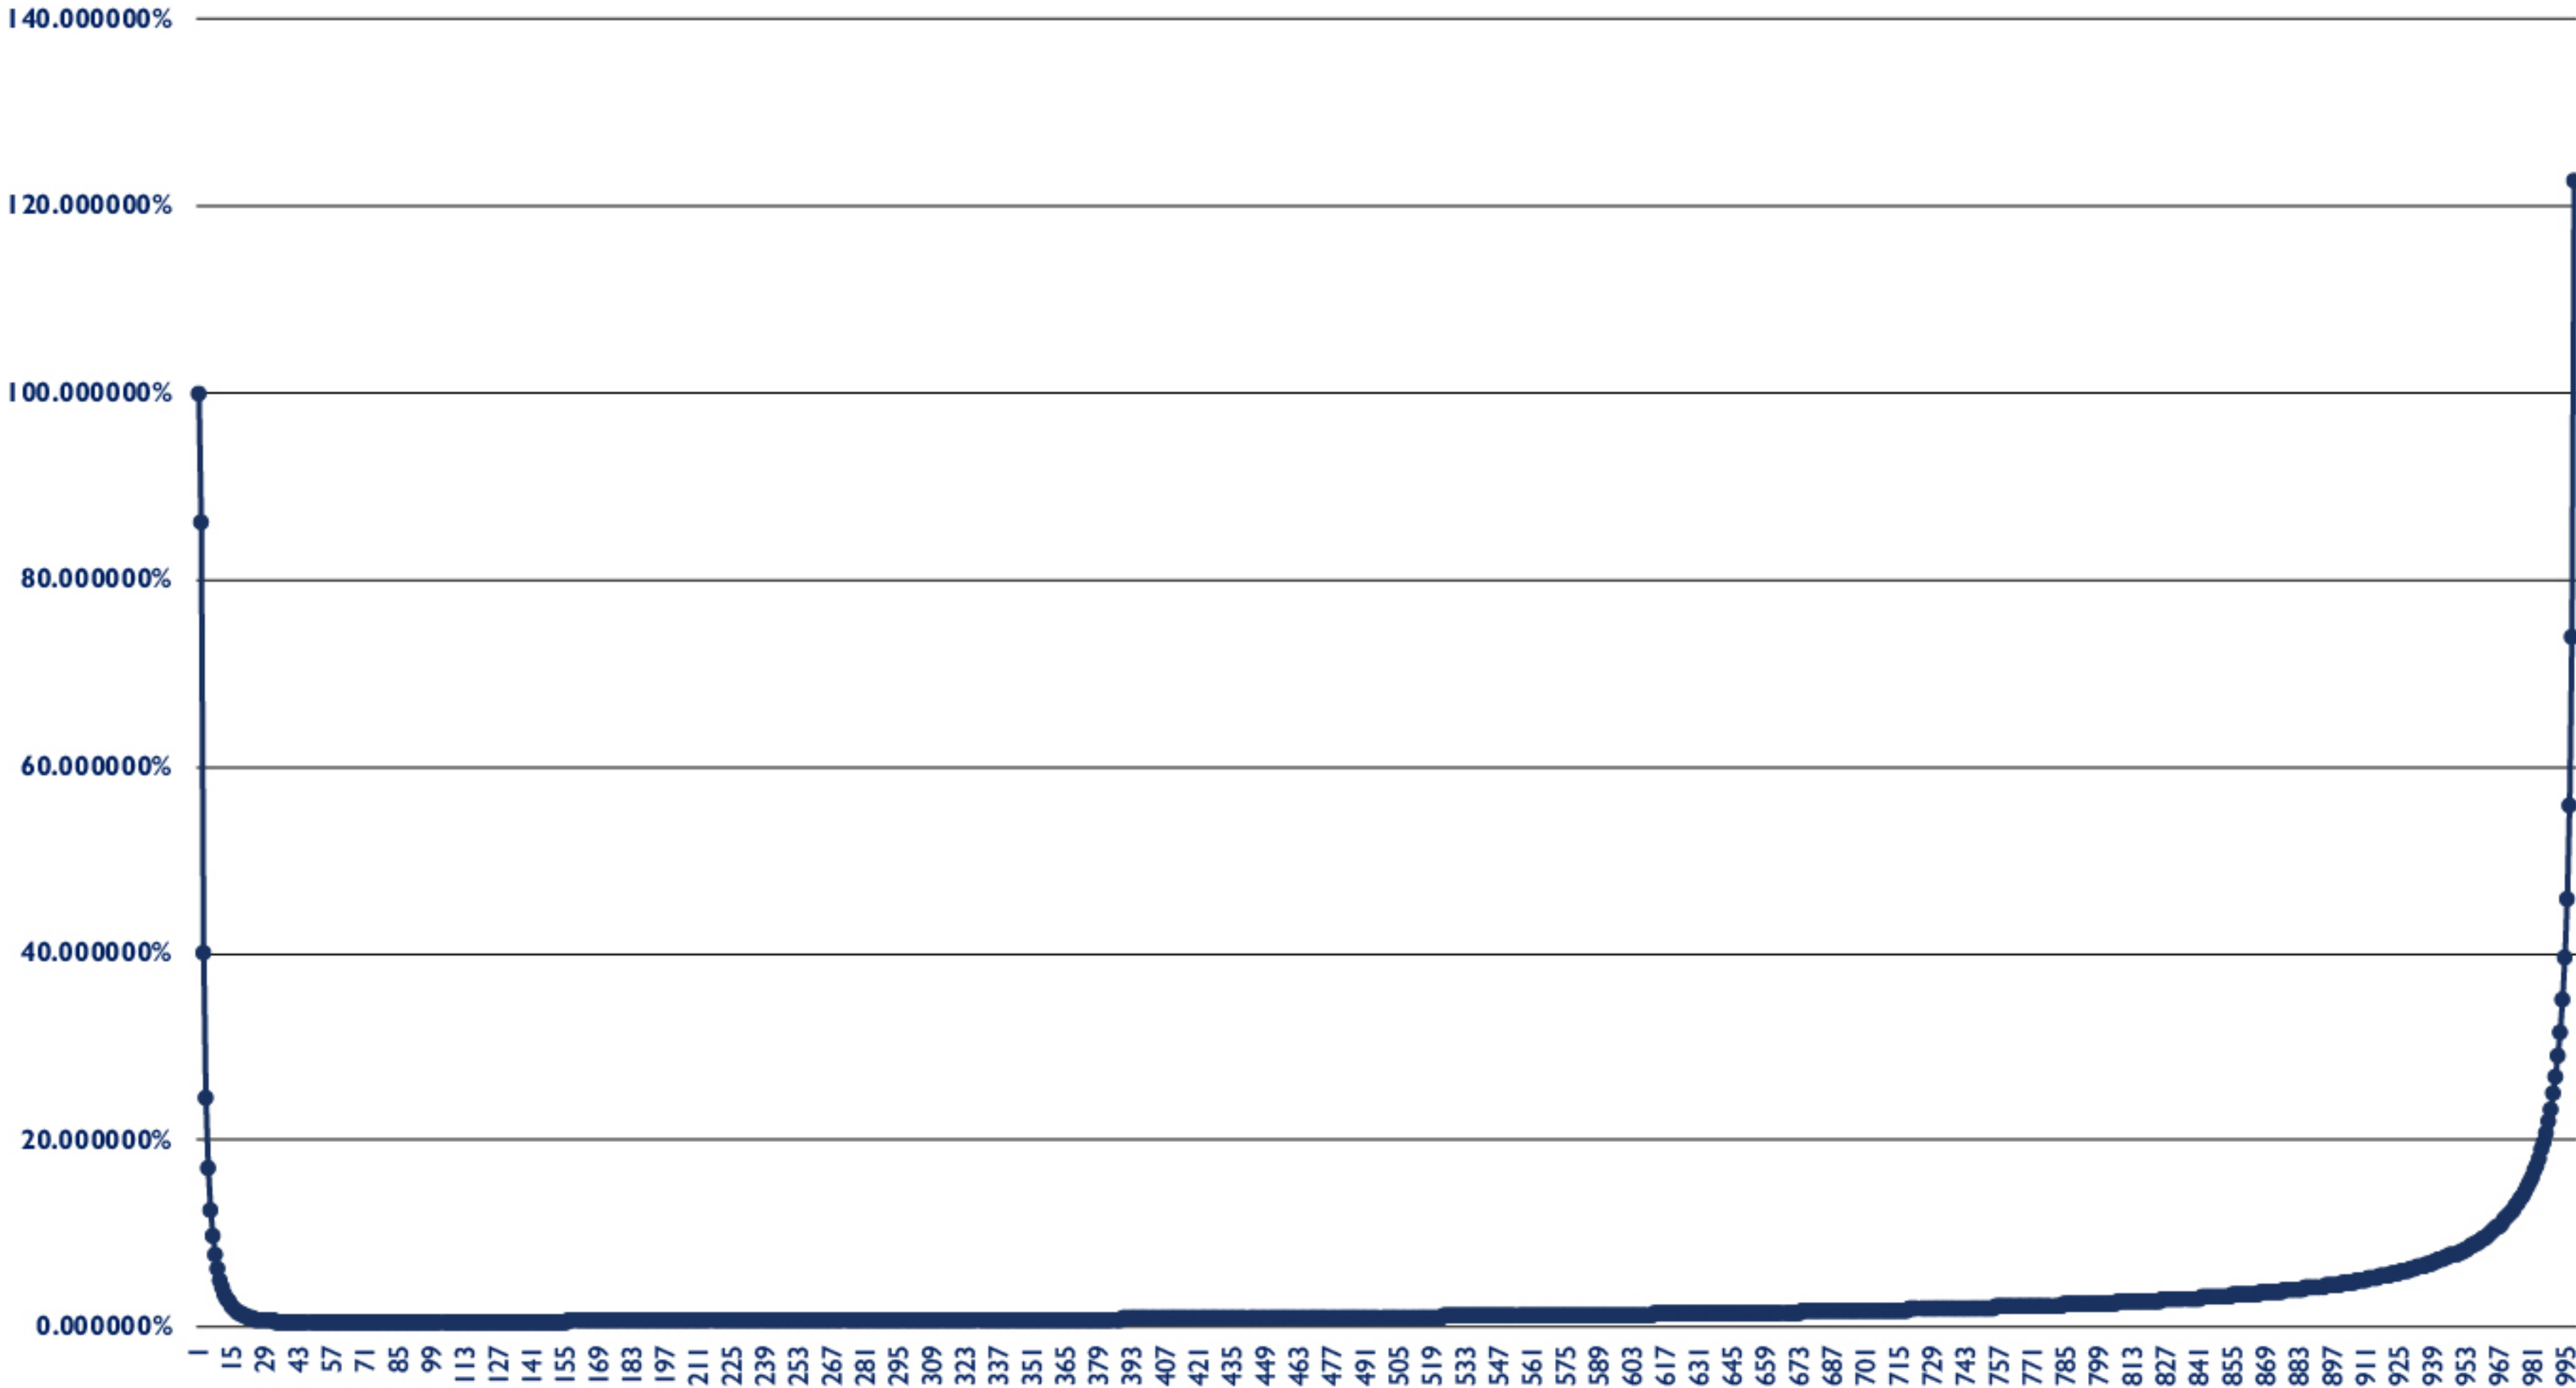

1. COIN PRICE IN USDT
2. MARKET VALUE OF ALL COINS
3. COIN TURNOVER
 - A. CIRCULATING SUPPLY
 - B. NON-CIRCULATING SUPPLY
4. USDT TURNOVER
5. EXCHANGE RATE - VALUE INCREASE/DECREASE IN %
6. AVERAGE MARKET COST OF PRODUCING 1 KW OF ENERGY

WHAT IS WATT COIN?

THE RESULT OF THIS ALGORITHM IS A UNIQUE PARABOLIC CURVE REPRESENTING THE COIN'S VALUE TRAJECTORY.

% Rate

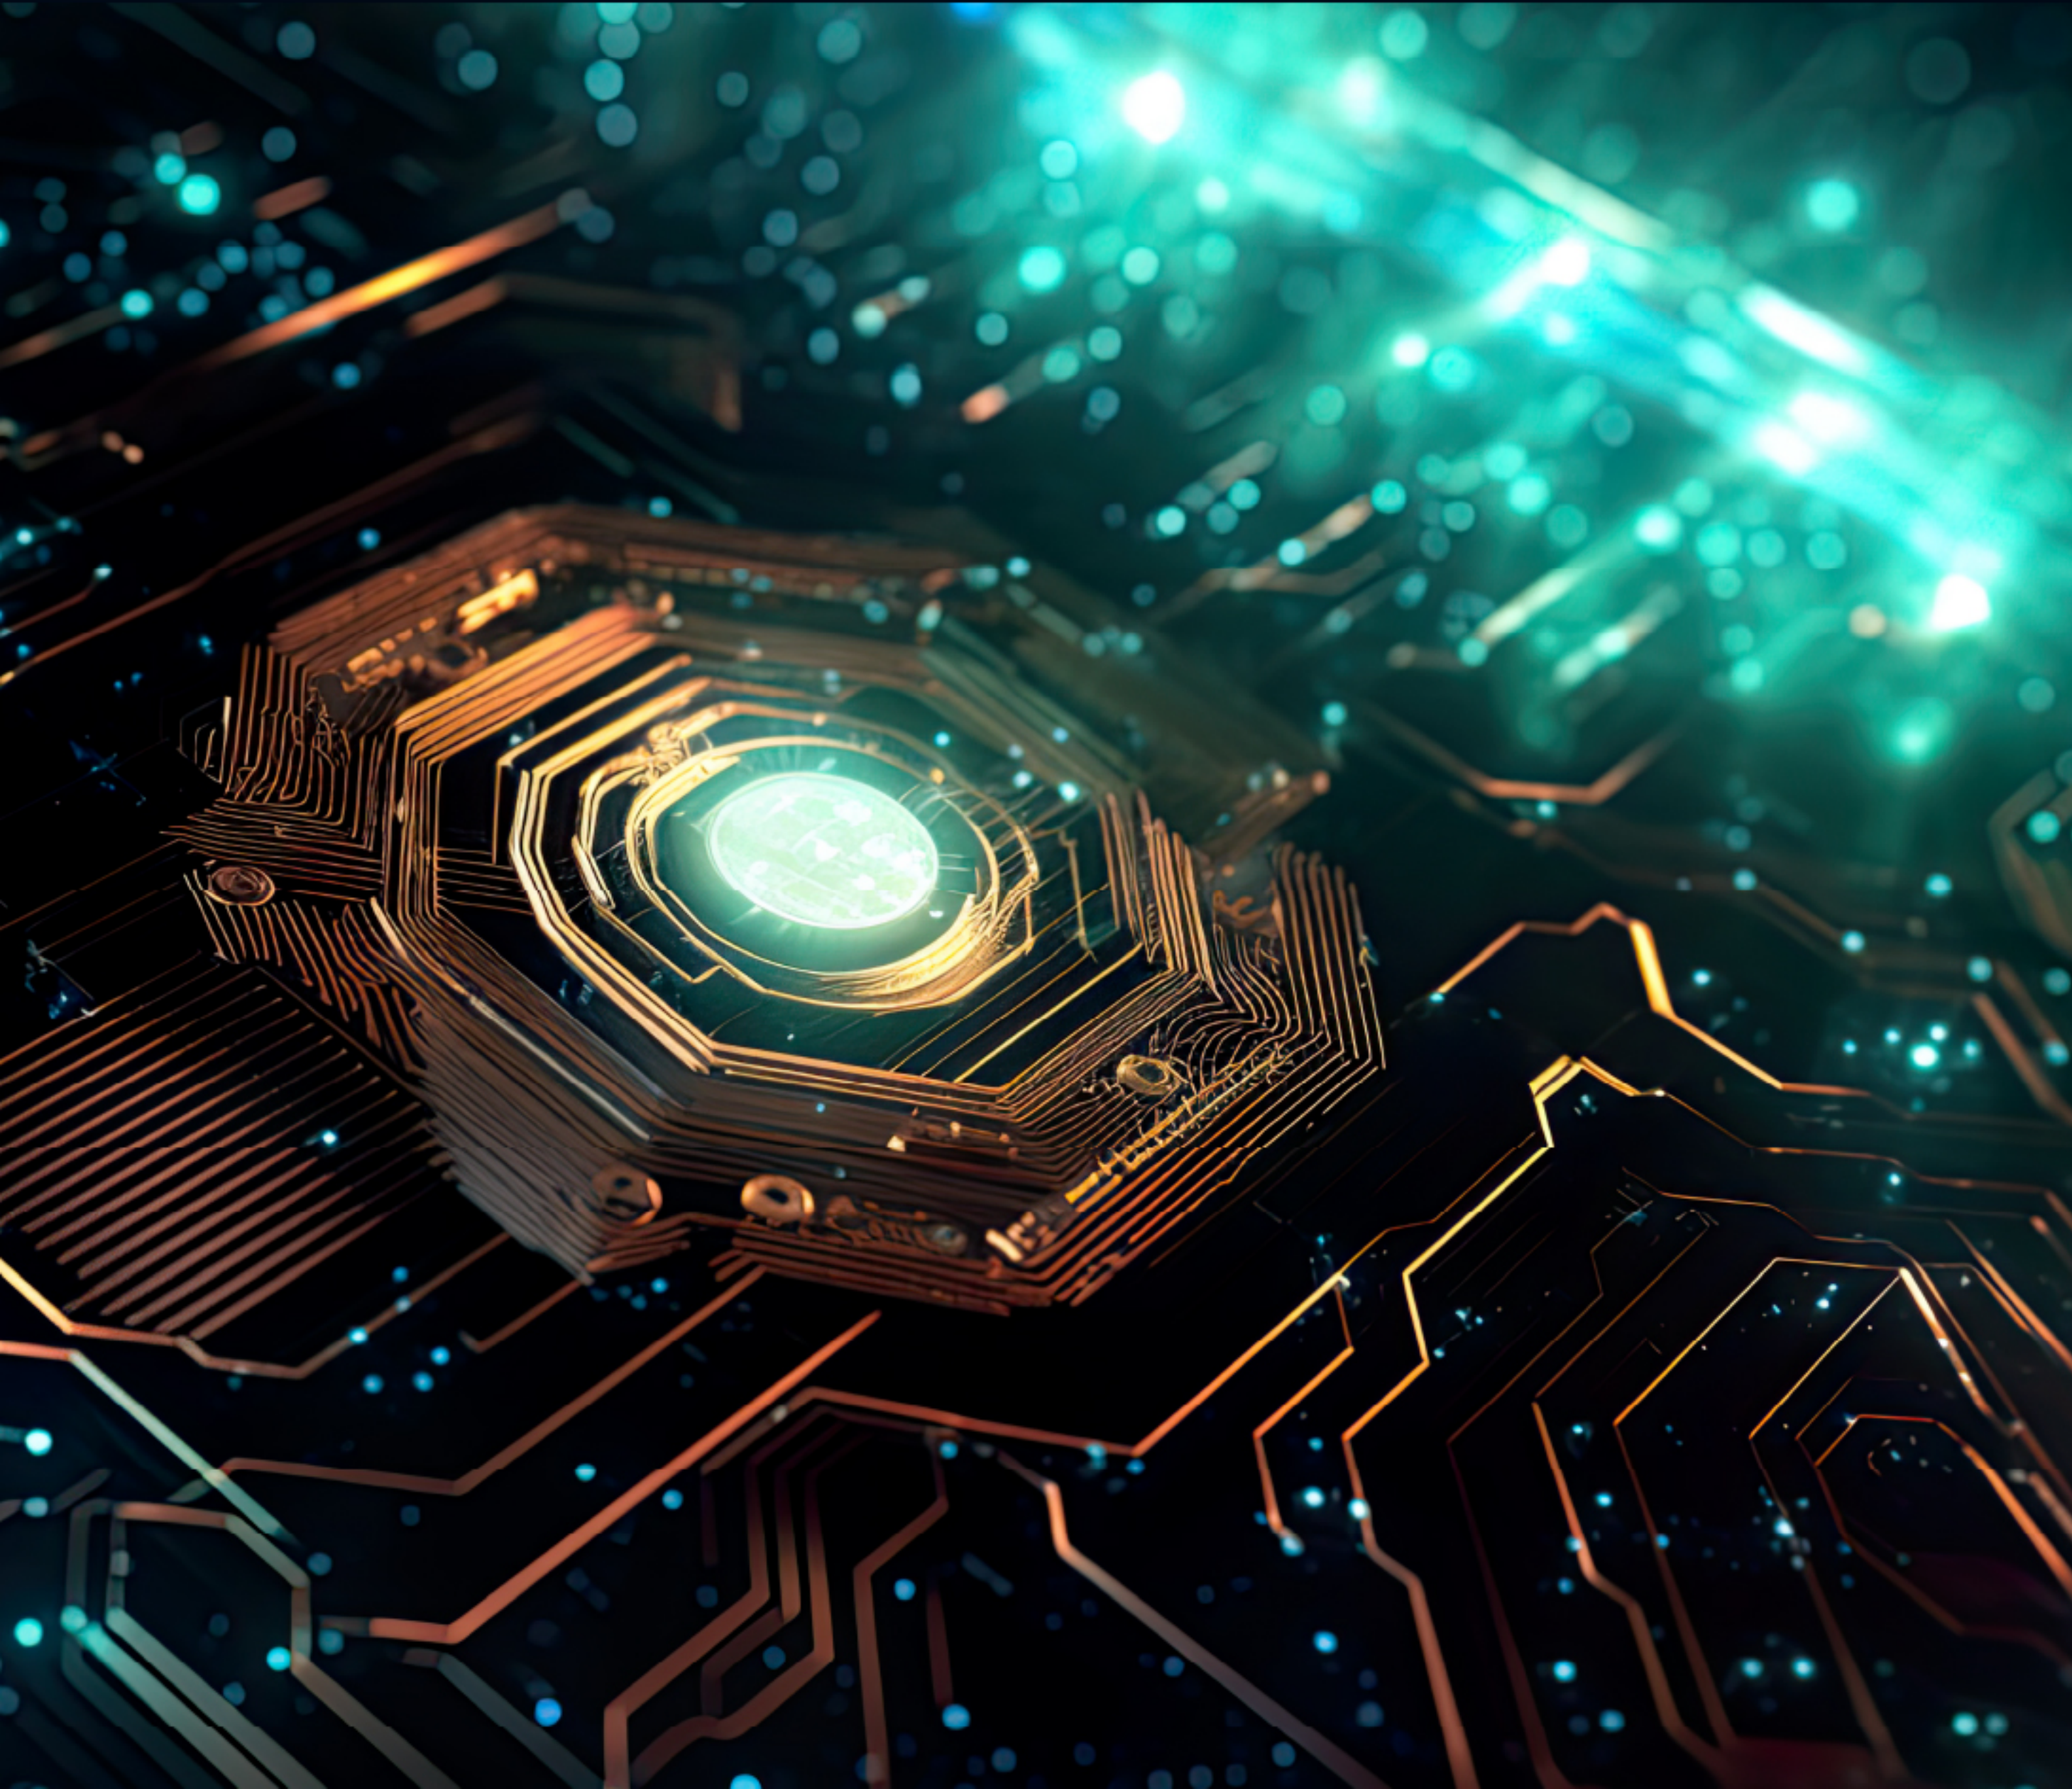

SINCE A COIN'S VALUE DEPENDS ON THE NUMBER OF COINS IN CIRCULATION, AND THE TOTAL NUMBER OF COINS IS BOTH LIMITED AND CONSTANT, THE MARKET LIFE CYCLE RESEMBLES A PARABOLA RATHER THAN A SINE WAVE. THE GRAPH ILLUSTRATES THAT A COIN'S VALUE INCREASES AS THE NUMBER OF COINS IN CIRCULATION GROWS, AND VICE VERSA. HOWEVER, THERE IS A PATTERN AT THE BEGINNING AND END OF THE PARABOLA – THE COIN'S VALUE RISES OR FALLS IN MULTIPLES.

THIS PATTERN IS BENEFICIAL FOR A MEANS OF PAYMENT, WITH ONE CRUCIAL EXCEPTION – THE INITIAL TRADING LAUNCH IN THE WATT COIN SYSTEM SHOULD NOT BEGIN AT THE PARABOLA'S STARTING POINT BUT RATHER FROM THE STARTING POINT CALCULATED BY THE ALGORITHM. IT IS ESSENTIAL TO REDEEM 16% OF THE COINS FROM CIRCULATION AT THEIR INITIAL VALUES, WHICH WILL SERVE AS THE SOLE REGULATOR OF POTENTIAL SHARP RATE FLUCTUATIONS.

THE GRAPH ALSO DEMONSTRATES THAT A COIN'S VALUE INCREASES IN MULTIPLES RELATIVE TO THE ENTIRE MARKET'S VALUE IF THE NUMBER OF COINS IN CIRCULATION APPROACHES 100%. THIS PATTERN ENSURES THAT THERE WILL ALWAYS BE A SUFFICIENT SUPPLY OF COINS, AS THERE WILL INEVITABLY BE SOMEONE WHO PURCHASED AT A MULTIPLE OF THE PRICE.

TRANSACTIONS

THE VALUE OF A COIN IS FIXED AND PRE-GENERATED IN THE VALUE TABLE. THE VALUE AT THE TIME OF PURCHASE OR SALE IS DETERMINED INDIVIDUALLY FOR EACH COIN. WHEN PURCHASING, THE VALUE INCREASES; WHEN SELLING, IT DECREASES. THAT IS, IF YOU BUY OR SELL 5 COINS SIMULTANEOUSLY, THE VALUE WILL BE CALCULATED SEPARATELY FOR EACH COIN, INCREASING IF YOU BUY AND DECREASING IF YOU SELL. EACH SUBSEQUENT COIN WILL HAVE A HIGHER OR LOWER COST, AS ILLUSTRATED IN THE TABLE:

Pcs.	Pcs.	% rate	Price USDT	Market value	Turnover USDT
999787	213	0,0006460422%	0,072555	72 554,13	14,99
999786	214	0,0006460429%	0,072555	72 554,59	15,06
999785	215	0,0006460435%	0,072556	72 555,04	15,14
999784	216	0,0006460442%	0,072556	72 555,49	15,21
999783	217	0,0006460449%	0,072556	72 555,95	15,28
999782	218	0,0006460455%	0,072557	72 556,40	15,35

IF THE MARKET IS CURRENTLY IN A HALF-POSITION WITH 215 COINS IN CIRCULATION AND 999999785 IN THE BALANCE, THEN THE TOTAL COST OF PURCHASING 5 COINS WILL BE:

$$0,072556 + 0,072556 + 0,072556 + 0,072557 + 0,072557 = 0,362782$$

WHEN SELLING:

$$0,072556 + 0,072555 + 0,072555 + 0,072554 + 0,072554 = 0,362774$$

LIFE CYCLES OF THE WATT COIN MARKET

IN THE WATT COIN LIFE CYCLE, WITH TWO PATTERNS IN ONE ALGORITHM AND A PARABOLA AS A RESULT OF THE EXCHANGE RATE CALCULATIONS, WE CAN ANTICIPATE THE FOLLOWING:

1. "THERE WILL BE NO END" – COINS WILL ALWAYS BE IN CIRCULATION AND WILL NEVER RUN OUT.
2. THE MARKET WILL DETERMINE THE VALUE AUTONOMOUSLY, AS IT WILL BE AWARE OF AND REGULATE THE NUMBER OF COINS IN CIRCULATION WITHIN ITS DOMAIN.
3. EACH MARKET PARTICIPANT WILL KNOW THE CURRENT COST OF BUYING OR SELLING A COIN AND UNDERSTAND HOW ITS VALUE WILL CHANGE FOLLOWING THEIR ACTIONS. IN OTHER WORDS, THEY WILL ACT AS INDIVIDUAL INSIDERS, COMPREHENDING THE MARKET'S REACTION AND THE SUBSEQUENT VALUE AND EXCHANGE RATE CHANGES.

IN A PARABOLIC LIFE CYCLE, THERE ARE NO INFLATIONARY SPIKES ASSOCIATED WITH THE ISSUANCE OF NEW COINS, NOR IS THERE SPECULATION WHERE SOMEONE CAN SUDDENLY SELL THE MAXIMUM NUMBER OF COINS AT THE HIGHEST PRICE. EACH TIME ANOTHER COIN IS SOLD, THE OWNER WILL RECONSIDER THE FEASIBILITY OF THE ACTION, UNDERSTANDING THE DIMINISHING VALUE OF EACH SUBSEQUENT COIN. CONSEQUENTLY, THE OWNER WILL ALWAYS RETAIN COINS IF THEIR ACTION COULD SIGNIFICANTLY COLLAPSE THEIR VALUE.

LIFE CYCLES OF THE WATT COIN MARKET

THE LIFE CYCLE IN SUCH A PARABOLA WILL EXHIBIT AN UPWARD TREND. AFTER THE GROWTH AND DECLINE SPIKES, IT WILL STABILIZE, WITH THE MARKET ACCOMMODATING AS MANY COINS AS NEEDED. FURTHER REDEMPTION AND INCREASE IN CIRCULATION WILL BECOME IRRATIONAL. AS A RESULT, THE EXCHANGE RATE WILL PLATEAU AND REMAIN STABLE INDEFINITELY, EVENTUALLY MAKING THIS CURRENCY THE MOST STABLE IN HISTORY. THE RATE WILL BE INFLUENCED SOLELY BY THE COST OF PRODUCING 1 KW OF ELECTRICITY.

THIS ALGORITHM REPRESENTS AN IDEAL MATHEMATICAL SYSTEM FOR THE LIFE CYCLE OF A MEANS OF PAYMENT, IMPERVIOUS TO THE CONTROL OF BOTH THE "INVISIBLE HAND OF GOD" AND ADAM SMITH HIMSELF. THE ENTIRE PROCESS IS TRANSPARENT, OPEN, AND KNOWN TO ALL MARKET PARTICIPANTS.

WATT COIN: A CRYPTOCURRENCY BACKED BY ENERGY RESERVES

AS MENTIONED EARLIER, THE INITIAL VALUE OF THE FIRST COIN IS AN AXIOM, BUT THE VALUE OF THE SECOND COIN IS INFLUENCED BY VARIABLES, PARTICULARLY THE AVERAGE GLOBAL COST OF PRODUCING 1 KW OF ELECTRICITY IN USDT EQUIVALENT. THIS IMPLIES THAT AT THE TIME OF PURCHASE, WATT COIN HAS AN EQUIVALENT AMOUNT OF USDT IN ITS ACCOUNTS. THESE FUNDS ARE UTILIZED WEEKLY TO REDEEM ELECTRICITY BONDS FROM COMPANIES PROVIDING ENERGY STORAGE SERVICES.

EACH WATT COIN REPRESENTS A GIGAWATT (GW) OF ENERGY STORED BY ENERGY STORAGE COMPANIES. THE NUMBER OF KILOWATTS (KW) THAT CAN BE PURCHASED DEPENDS ON THE VALUE OF THE COINS SOLD DURING THE PREVIOUS TRADING WEEK. AS THE VALUE OF WATT COIN INCREASES, THE NUMBER OF KW OF ENERGY THAT CAN BE ACQUIRED FOR THEIR CURRENT VALUE AT THE PREVAILING WORLD AVERAGE PRICE AND KW OF ENERGY WILL PROPORTIONALLY INCREASE.

ALL REPORTS ON THE PURCHASE OF ENERGY STORAGE OBLIGATIONS BY COMPANIES WILL BE PUBLICLY AVAILABLE AND ACCESSIBLE TO ALL MARKET PARTICIPANTS.

UNITS OF MEASUREMENT FOR WATT COIN

1 W (ONE WATT) - 1 COIN
1 KW (ONE KILOWATT) - 1,000 COINS
1 GW (GIGAWATT) - 1,000,000 COINS
1 MW (ONE MILLIWATT) - 0.001 COINS
1 NW (ONE NANOWATT) - 0.000001 COINS

THE COST OF BOTH NANOWATT AND MILLIWATT IS STABLE, ENTIRELY DEPENDENT ON THE COST OF THE LAST 1 WATT. THEIR VALUES ARE EQUAL TO 0.1% AND 0.0001% OF ITS VALUE, RESPECTIVELY.

			Purchase/ sale price	Last watt price
Milliwatt	0,001 W	0,1%	0,45	450
Nanowatt	0,000001 W	0,0001%	0,00045	

FINANCIAL ASPECTS

WATT COIN OPERATES AS A CLOSED FINANCIAL AND MATHEMATICAL MODEL FOR CALCULATING THE VALUE OF EACH INDIVIDUAL COIN. THE ONLY FACTOR THAT CAN CHANGE THE VALUE OF COINS AND REGENERATE THE "VALUE TABLE" IS THE COST OF PRODUCING 1 KW OF ELECTRICITY.

REVENUE STREAMS:

- WATT COIN'S FOUNDERS PURCHASE A PORTION OF COINS AT THE OPENING STAGE OF TRADING ON THEIR OWN TRADING PLATFORM AND DISTRIBUTE THEM PROPORTIONALLY AMONG THEMSELVES. EACH FOUNDER HAS THE RIGHT TO SELL THEIR COINS WHENEVER THEY WISH, THEREBY GENERATING INCOME.
- TRANSACTION FEES SERVE AS A REVENUE SOURCE, PROVIDING A SERVICE TO CUSTOMERS. ALL ORDERS ARE CLOSED WITHIN 24 HOURS, AND ALL CALCULATIONS ARE COMPLETED.
- PORTFOLIO MANAGEMENT OF SECURITIES, WHICH INVOLVES PURCHASING BONDS AND DEBT OBLIGATIONS AT A PRICE BELOW THE MARKET AVERAGE.

SECURITY

THE INTERNET PORTAL WATTCOIN.ORG IS A SERVICE THAT ALLOWS USERS TO ACCEPT PAYMENTS FOR THE PORTAL'S SERVICES, WITH WATT COIN SERVING AS THE CHECK (GUARANTEE OF THE SERVICES PROVIDED). AT THE INITIAL STAGE, THE COINS ARE STORED IN A WALLET ON THE PORTAL. THE PORTAL ALSO OFFERS SERVICES FOR REDEEMING WATT COINS FROM ANY USER USING THE PROVIDED CHECK, WITH THE COINS BEING DEBITED FROM THE WALLET ON THE PORTAL.

THE PRIMARY GOAL IS TO ENABLE CONFIDENTIAL PAYMENTS AND CREATE A CRYPTOCURRENCY ALTERNATIVE TO MONERO IN TERMS OF PRIVACY. THE PORTAL'S USER DATABASE WILL BE OPEN, CONTAINING ONLY COOKIE SETTINGS. THE DATABASE WILL BE DIVIDED INTO TWO CATEGORIES: A SEPARATE DATABASE FOR TRANSACTIONS AND ANOTHER FOR CRYPTOCURRENCY WALLET OWNERS. ALL TRANSACTION DATA BLOCKS WILL BE OPENLY ACCESSIBLE TO EVERY USER. ACCESS TO THE WALLET ACCOUNT, HOWEVER, WILL REMAIN CONFIDENTIAL, SIMILAR TO EXISTING CRYPTO WALLETS.

WALLET IDS WILL BE ENCRYPTED AND LINKED TO TRANSACTIONS USING A SUBSTITUTE, PUBLIC ID. DECRYPTING THE CODE TO OBTAIN THE TRUE ID WILL BE IMPOSSIBLE WITHOUT THE CRYPTO ENCRYPTION KEY, WHICH WILL BE INACCESSIBLE AND DESTROYED.
